is to learn how you are viewing your child's experience.

The purpose of this meeting is to discuss and address any concerns you may have regarding your child's progress at the Children's Center. We will have a discussion with you in August or September before your child starts in the Early Childhood Education Program. We will also talk with you about how the Child's Center will be involved in the local educational community.

During the following evaluation sessions, we will be evaluating your child's progress at different times, and their progress will be monitored. We will be reviewing all aspects of the child's development and will be looking closely at all areas of the child's growth.

Because this is a new way to provide special education services, we wish to evaluate very carefully how the change is going. A team of professionals from the County's Special Education Cooperative will work with the Early Intervention Program, a teacher, and a parent to provide services at the Children's Center, when they feel that the services are necessary for the child. Parents and professionals will be involved in providing special education services to your child.

Dear Parent,

August 1993
